I waste off time for great tower defence ??? worth it, cheap, and soo hard.

Easy mode like extreme mode, try it. Well... Compared to the first one, it's better in the sense it actually does use a normal 9 x 9 Sudoku Grid, and that can make it quite challenging. I said "can" as halfway through my first puzzle I realized the developers did probably no testing on this game before releasing it, and the preset placement of fruits was off and therefore impossible to solve. Something like that not happening in Sudoku is pretty crucial, so for that I would not recommend it.... i haven't played much of this game but the son is exploding and you shoot people. A good arena style shooter with nice music if I'm honest. Its addictive and the computer is no push over so the challenge keeps things interesting. With different characters to choose from its allows you to fight from your style of play rather than just one i.e long range or speedy etc. Definatly worth the money if this is your kind of thing and you can definatly kill some time with this game.

<https://www.youtube.com/watch?v=aMQhfpFqEE>. The gameplay is solid and the presentation is great, but that's it for now. There are many bugs, the keyboard controls are borked and the UI/menus are much too lacking. As well as this there's no form of online connection.

However, this game has a lot of promise with it being in early access. I hope that it flourishes and fixes its issues and quickly adds more content soon. Definitely give this game a try with a friend or two, but be wary if alone.. This game is great, it just lacks more players to play !. Blood of Old meets Bob the Builder.

The result is pure cancer.. Played the first episode right through today and had a lot of fun with it. There is no deep story or mind bending puzzles here- just simple point and click, with a little inventory puzzling. It is silly and can even be annoying at times but in a good way.

Impossible to get stuck due to the ingame help system- the voice acting suits the characters as does the cartoony graphics. can't wait to play the other two episodes!

This is a really scary and well made game that i am enjoying allot to play thru!
you can see me play it on youtube

Pro's
amazing atmosphere
great animations
real genuine jumpscares.

cons
lamposts.. i got something to say. addicting game. This game literally doesn't work on modern systems. Screen aspect, control, menu UI, sound.. Nothing works on a computer built after 2005.. got 90% discount, paid 11 cents. Plz refund.. I would not recommend this game. It is too slow, and does not fulfill the need for an RPG IMO.
