Buy game, install, see absolutely no one playing multiplayer(not even 1 person on the servers) proceed to play singleplayer. Make character, load into game only to find that I'm alone with nothing to do, nothing to fight, no objectives what-so-ever??? Huh? Ran around for like 10 minutes picking up the power-ups spread around the big desert area and quit the game. REFUND, thx.. I have been Waiting for this game since 2016 when i found it on green light and its nice obviously its new so alot is broken and there arnt alot of people on the game right now but from what i have seen its pretty great and will be a really fun game when it advances
